

Broadband Subscriber Access Pedestals

Amphenol's line of Broadband Subscriber Access pedestals provide mounting and security for fiber taps, RF taps and line passives and larger fiber terminals found in today's Fiber-to-the-Home or coaxial based access networks.

Each pedestal is available in three colors, including light green, dark green and beige. The hex-head self-locking dome provides added protection against open enclosures. The Z02 and R02 include integrated equipment mounting stakes which allows the equipment to be secured directly to the stake. The bases on the B-series pedestals are self-supporting. The B-series incorporates a rear positioned equipping mounting stake and allows equipment to be secured directly to the stake.

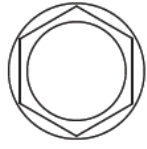

All the pedestals are constructed from a polyethylene resin specifically designed for outside plant environments, resisting impact, ultraviolet and environmental degradation.

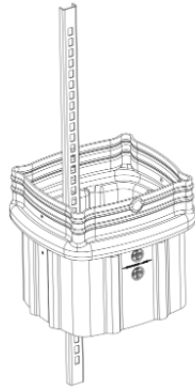

Product Features

- Molded of polyethylene (PE) with ultraviolet (U/V) inhibitors to provide color stability, impact resistance, and long-life
- Housing colors: light green, dark green and beige
- Self-latching, dome locking system reduces unlocked pedestals and unwanted access
- Hex-head locking bolt for use with standard 7/16" CAN or terminal wrench
- Molded-in ground line for consistent installations
- Temporary drop access feature
