

Amphenol Z05 and Z06 Series Vented Vertical Pedestals provide ease of installation and maintenance along with robust protection for both active and passive devices and well as fiber components in below grade outside plant cable environments.

The pedestals are made of UV stabilized high impact resistance HDPE. The pedestals have a thermally optimized integrated insect resistant vented design. This provides a robust pedestal housing that can confidently be used to house active as well as passive components in RF and Fiber network deployments. There are a number of different bracket configurations available to mount a variety of hardware. During installation, simply bury the pedestal base to the desired depth and backfill. The pedestal has been designed for stability and mitigates pull-over.

## Features:

- Secure and robust for all weather conditions with high-impact resistant UV stabilized material.
- Thermally optimized integrated vent design for reliable operation in all environments.
- Craft-friendly one-piece dome comes with a self-latching lock that slides easily into secure locking position. Temporary drop access.
- All hardware and bracket options are constructed of aluminum and stainless steel for sturdiness.
- 360° access and rectangular shape provides increased workable area.

- Telecom / FTTX
- Utility
- Wireless
- Broadband Cable

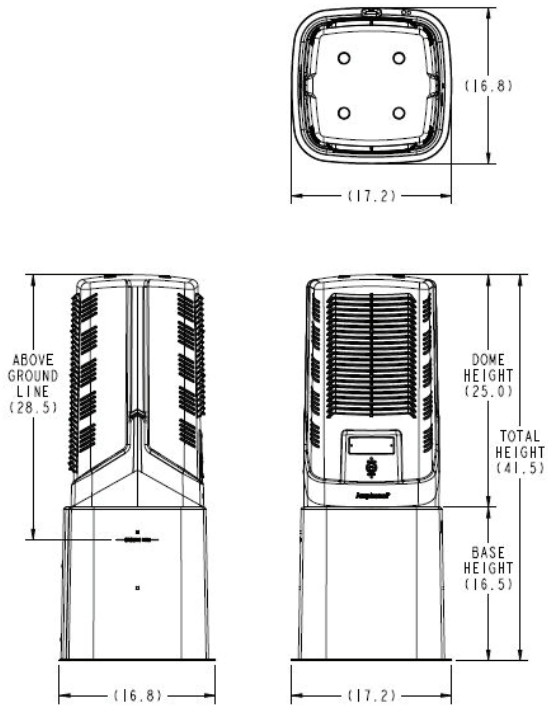

Well vented / 360° access
