

Amphenol's Z05 and Z06 series vented vertical pedestals provide ease of installation and maintenance and robust protection for active and passive devices, including fiber components in below-grade outside plant cable environments. The pedestals are built with UV-stabilized high-impact resistance HDPE and have a thermally optimized integrated insect-resistant vented design. This innovative design provides a robust pedestal housing that protects to house active and passive components in RF and Fiber network deployments. In addition, several different bracket configurations are available to mount various hardware.

Z05 & Z06 Pedestals

Installation:

The pedestal has been designed for stability and mitigates pull-over. During installation, bury the pedestal base to the desired depth in the ground and backfill. Additionally, the pedestals come with various self-locking dome options to address specific security requirements.
