

The T10 & TX10 Hardline cable line is a seamless extruded tube. Amphenol Broadband Solutions' T10 & TX10 cable will outlast the standard welded tube cables.

This cable is designed to eliminate pinhole leaks and microcracking. This cable line can be used with all the coring tools and connectors.

## Features:

- Clean coreability and preparation  
Triple bonded
- Tighter bend radius than double bonded cable
- No air gap. Eliminates a common path for moisture found in double bonded cable
- Prevents suck outs
- Eliminates suck backs
- Works with industry standard coring tools and connectors
- NEC 820 CATV & CATVR listings available
- Recyclable reels and packaging

Cable Solutions for the CATV Market

**TARIFF FREE**

When you buy "American Made" you never have to worry about tariffs or shipping delays!

Our 24/7 production ensures Amphenol has you covered every step of the way!

Amphenol understands you need product when you need it! So, why wait? Lead-Times typically 7 days or less!

Don't let excuses slow your projects down!

With over 21 Million Ft. In-Stock, Amphenol has the product you need on the shelf ready to ship at a moments notice!

When you have been manufacturing hardline cable for over 75 years, you can rest assured our quality and supply are the best in the industry! With our 10 year limited warranty we stand behind the products we manufacture with a 99.9999% quality rating!

Whether you are leading a team of technicians, hiring contractors, or getting your hands dirty, Amphenol Broadband Solutions has a training solution for you. Today, it's about choices and ABS is equipping you with the power to choose when, where, and how technical education will take place.
